# Aryan Raikar

Antioch, CA 94531
(949) 556-2197 araikar.tech@gmail.com linkedin.com/in/aryanraikar

## Education

**University of California, San Diego** **La Jolla, CA**
B.S. in Computer Science & Mathematics Graduated, June 2026

- **Relevant Coursework**: Advanced Data Structures & Algorithms, Computer Organization & Assembly Language, Object-Oriented Programming, Probability Theory, Mathematical Reasoning & System Analysis, Discrete Mathematics

## Experience

**Wells Fargo** **August 2026 - Present**
Software Engineer, Applied AI San Francisco, CA

- Shipped a ground-up enterprise estate management platform (React, Python, MongoDB) as the sole full-stack engineer, surfacing 100+ previously untracked end-of-life risks for Technology CIOs, VPs, and 2,000+ internal users.
- Cut design intake from 3+ days to under an hour across 300+ briefs by engineering a Claude Opus 5.5 agent with tool calling, schema-validated JSON output, and streaming, replacing a manual, file-scattered intake process.
- Shipped the agentic intake platform (React, Node.js, Python, PostgreSQL) to 10+ product teams within weeks of pilot, persisting multi-turn conversation state in PostgreSQL so users can pause and resume intakes across sessions.
- Migrated a HITL approval workbench to an enterprise agentic platform in 3 days (React, Fluent UI, FastAPI), letting human reviewers approve or reject escalated actions from a customer-facing AI agent and unblocking platform work.
- Engineered a FastAPI agent-routing gateway with registry lookup, custom timeouts, and 24+ unit/E2E tests.

**Wells Fargo** **June 2025 - September 2025**
Software Engineer Intern San Francisco, CA

- Developed RESTful microservices with Java, Spring Boot, and OpenAPI, scaling performance for 4M+ BillPay users.
- Built 97% precision anomaly detection system using SPC and LightGBM, reducing customer financial risk.
- Achieved 100% JUnit coverage across BillPay modules using Mockito and dependency injection, improving reliability.
- Streamlined CI/CD workflow by instituting protected-branch rules and GitHub actions for automated build and testing.

**Albertsons Companies** **June 2024 - August 2024**
Software Engineer Intern Pleasanton, CA

- Engineered GenerativeAI RAG Chatbot integrating Gemini LLM and external data, enhancing vendor automation.
- Optimized Kafka clusters and RESTful APIs transferring JSON payloads from MongoDB, reducing GPU usage by 15%.
- Automated text embedding and vector storage with LangChain, improving chatbot retrieval efficiency by 20%.
- Designed architecture diagrams and implemented CI/CD pipeline using GitHub actions.

**RadicalAI** **May 2023 - August 2023**
Machine Learning Intern New York, NY

- Integrated REST APIs in NodeJS for AI-powered on-boarding chatbot, improving user experience and engagement.
- Implemented MinHash and Rabin-Karp algorithms for code similarity detection, reducing false positives by 25%.
- Trained Gradient Boosting model with Pandas and Scikit-Learn on mouse metrics data, achieving 91% accuracy on behavioral classification.

## Projects

**Agentic AI Code Review** | Python, React, TypeScript, PostgreSQL **June 2026**

- Built a full-stack agentic PR review tool to automate analysis, using SQL to persist repository context and diffs.

**Oddle - Data Platform** | Python, React, TypeScript, PostgreSQL, JWT **August 2025**

- Developed a data application, ingesting real-time sportsbook odds to detect +EV and arbitrage trading opportunities.
- Digitalized previous sports data business to 4,500+ customers with 6-figure ARR with 2.5M+ impressions YTD.

## Technical Skills

**Languages**: Python, Java, TypeScript, JavaScript, C++, SQL, HTML/CSS
**Frameworks & APIs**: Spring Boot, React, Node.js, REST APIs, JUnit, OpenAPI 3.0
**AI, ML & Data**: LangChain, RAG, Gemini LLM, LightGBM, Scikit-Learn, Pandas, SPC
**Cloud, Databases & Tools**: AWS, GCP, OpenShift, Docker, PostgreSQL, pgvector, MongoDB, Kafka, GitHub Actions
